Native Italian Speaker

Fluent English Speaker

Since 2008 I have been Managing Director for Metro Service operating the award-winning driverless metro in Copenhagen.

Under my leadership Metro Service has delivered a significant return of investment for the shareholders, consistently high service availability and impressive customer satisfaction, as well as supporting the start-up and mobilisation of many newly-built driverless Metros such as Riyadh, Milan, Brescia, and Rome.

In 2017, Metro Service had two major achievements. We won the O&M contract for the Greater Copenhagen Light Rail and regained the O&M contract for the Copenhagen Metro M1+M2. Currently, we are mobilising for the Copenhagen Metro M3+M4, which opens in 2019. During this process, the organisation will grow from 300 to 550 employees.

As Managing Director my focus is the continued business development of Metro Service, ensuring the organisation is ready for new activities while maintaining the same high standard in the delivery of the existing activities. This includes setting strategic goals for the company, safeguarding financial growth, and creating a corporate culture in which we focus on meeting and exceeding our stakeholders' expectations. Currently, as Metro Service experience rapid growth, I especially emphasise the development of leadership competences at all levels of the organisation.

**Accreditations and Licenses**

Member of UITP IT &amp; Innovation Committee

Member of UITP Driverless Metro Observatory
